200L LPE Extraction System

POWERED SOMERE

PRODUCTION SERIES

Extraction Vessel

- **Volume:** 2x100L vessel holds up to 60-40 pound of dried and ground material
- Pressure: Maximum system operating pressure
 30 bar
- Temperature: max 7IC (160F)
- Materials: 304 stainless steel except closure bolts which are zinc coated grade 8 steel.
- · Vessel: interior is polished to food grade level
- · Closures: ASME flange, both ends
- · Sealing: self energized o-ring seals
- **Temperature measurement:** internal K type thermocouple senses
- · Jacket volume: 100 Liters (51.33 gallon)
- · Safety: spring loaded safety relief valve

Separator/Collection Vessel

- **Separator:** |acketed separator/collection vessel
- · Volume: 10 Liter
- Pressure: Maximum system operating pressure
 30 bar
- Temperature: max 71C (160F)
- · Materials: 304 stainless steel
- · Closures: high pressure clamp
- · Sealing mechanism: sanitary gasket
- Safety: spring loaded safety relief valve
- **Flow path:** from extractor to separator is continuous diameter with no constrictions.

Heat Exchanger

- · Construction: refrigeration unit
- Materials: all 304 stainless steel
- · Cooling/Heating: R134a refrigerant

Chiller/Receiver

- · Refrigeration: cooling
- Temperature range: -10C to 50C (14F to 158F)
- · Maximum solvent content: 350 kg

Physical Dimensions

- · Height: 2500mm
- · Length: 3020mm
- _____
- **Width:** 200mm
- Weight: 1000kg

Control System

- Functions: Fully automatic Programmable Logic Controller (PLC) touch screen interface with first level safety functionality and user programmable pressure, temperature and time.
- **Safety:** pressure transducers monitor system pressure and shut down system to prevent accidental over-pressurization
